User Story Template 4

Title: Posting a notice on a course	Priority:	Estimate: 10 Days for 1 Developer
As a teacher		
I want to send a notice to the students of a specific course that the class is cancelled		
so that I can inform the students and they don't have to join the class.		
Acceptance criteria		
Given a teacher dashboard to inform a batch via feed that the class is cancelled.		
When a user teacher to a feed of a specific batch, then there is an option to post to the feed. Teacher can click on that button and write the notice and click on publish.		
Then the information will be notified to all the students via email and they can see it in the course feed too.		
Platform: Linux, Cloud		
Language/framework: Laravel
